

BRAINSTORMING REPORT

TerraLink

IDEA PRIORITIZATION MATRIX

Ideas are evaluated using feasibility, impact, cost and implementation simplicity. Higher scores indicate stronger suitability.

Scoring: 1 = Very Low 2 = Low 3 = Moderate 4 = High 5 = Very High

Idea	Feas.	Impact	Cost	Simp.	Total	Priority
LoRa mesh communication	5	5	4	4	18	1
GPS for SOS location	5	5	4	5	19	1
SOS button / sensors	5	5	5	5	20	1
Power optimization	4	5	5	4	18	1
OLED status display	5	3	5	5	18	1
Dynamic relay nodes	3	5	3	3	14	2
Controlled flooding	3	4	5	3	15	2

Final Selection

The selected solution combines SOS activation, GPS location, LoRa mesh communication and power optimization. These features provide the best balance of impact, feasibility, cost and implementation effort for the TerraLink prototype.
